

Chapter 5: Get paid

Cash on Delivery is already switched on for every new store. Add more ways to pay in **Settings → Integrations**; the choices you see depend on your **Store Country**. Every method you switch on appears to buyers at checkout.

Screen 5.1: Integrations → Payment providers (online payments)

Use case: take card and wallet payments online. The money goes straight to your own account with the payment provider.

Where: **Settings → Integrations** (or the **Activate payments** button in the Setup Guide)

Integrations: Safepay connected and live, PayFast ready to connect, Stripe not available in Pakistan

Which providers you'll see:

Your store country	Online providers shown
Pakistan	Safepay, PayFast (JazzCash and Easypaisa direct connections are under **Advanced**)
United States and other Stripe countries	Card payment (Stripe), PayPal
India	Razorpay
Supported African countries	Paystack, Flutterwave
Europe	Mollie

To connect a provider such as Safepay:

1. First open an account with the provider on their own website and get your keys (for Safepay: **Secret Key** and **Client ID**).
2. On the provider's card, click **Connect**.
3. Paste your keys and save.
4. Follow any extra step the card shows (Safepay shows **One step left**, with what to copy into your Safepay account).
5. Click **Test**. You must run a test at least once before going live.
6. Switch on **Enabled at checkout**.

What you'll see: the card shows **Connected** and a **Live** badge.

To connect Stripe (in Stripe countries):

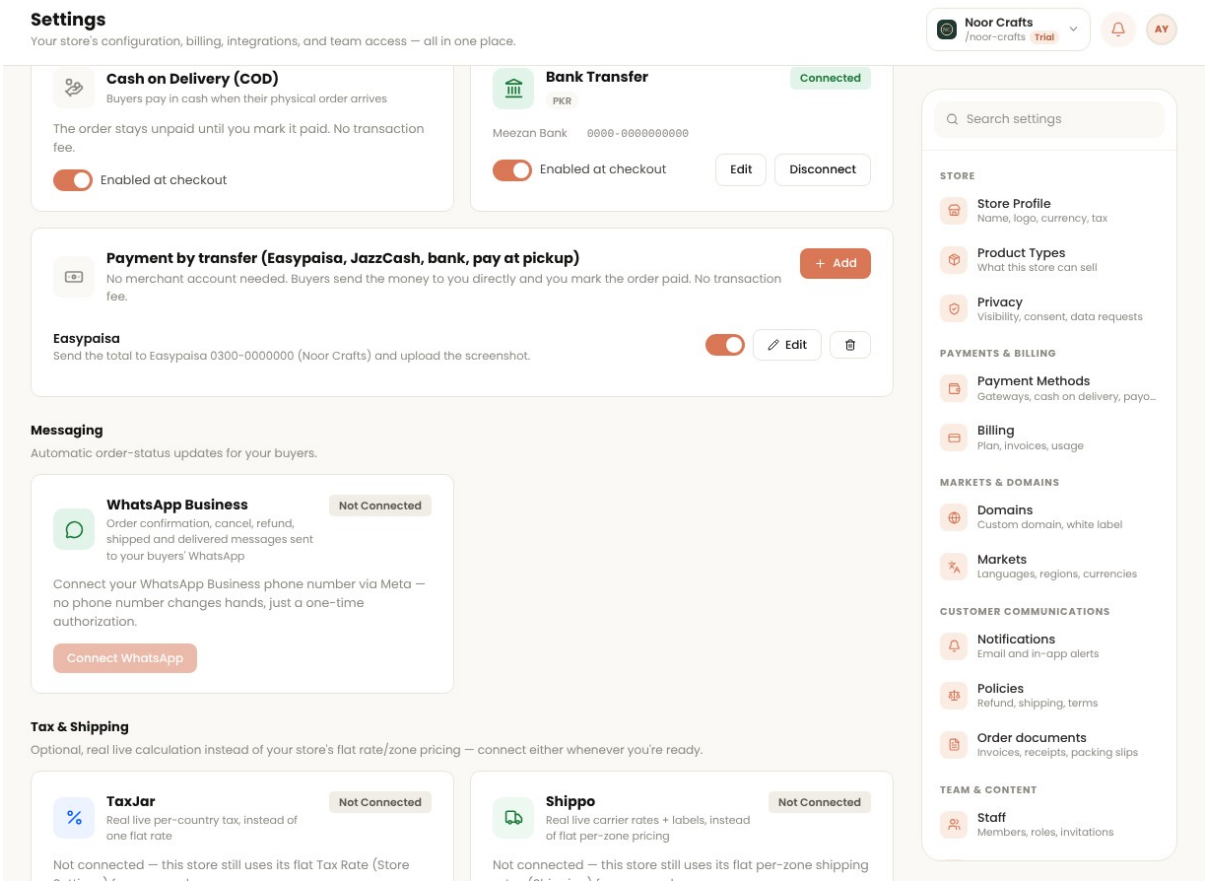

1. On **Card payment (Stripe)**, click **Connect with Stripe**.
2. Complete Stripe's own sign-up pages. You come back to Solvexo when done. If you stop half-way, click **Continue Setup**.

What you'll see: the Stripe card shows your **Payout schedule** and balances, and the Setup Guide ticks **Set up payments**.

> Note: Stripe does not support businesses in Pakistan. Pakistani stores should use Safepay, PayFast, Cash on Delivery or bank transfer.
>
> Note: payments through providers such as Safepay or PayFast carry a small Solvexo transaction fee that depends on your plan. It is billed once a month with your plan. Cash on Delivery and bank transfer carry no fee.

Screen 5.2: Integrations → Manual payment methods

Use case: payments you collect yourself: cash on delivery, bank transfer, Easypaisa or JazzCash transfers, or payment at pickup. The order stays unpaid until you mark it paid.

Manual payment methods: Cash on Delivery on, Bank Transfer connected, and an Easypaisa transfer method

Cash on Delivery (COD): already on. To stop offering it, switch off **Enabled at checkout**.

Bank Transfer (Pakistan stores):

1. Click **Connect**.
2. Fill in **Bank Name***, **Account Title*** and **Account Number***. Optional: **IBAN**, **JazzCash Number**, **Easypaisa Number** and **Instructions for buyer**.
3. Save.

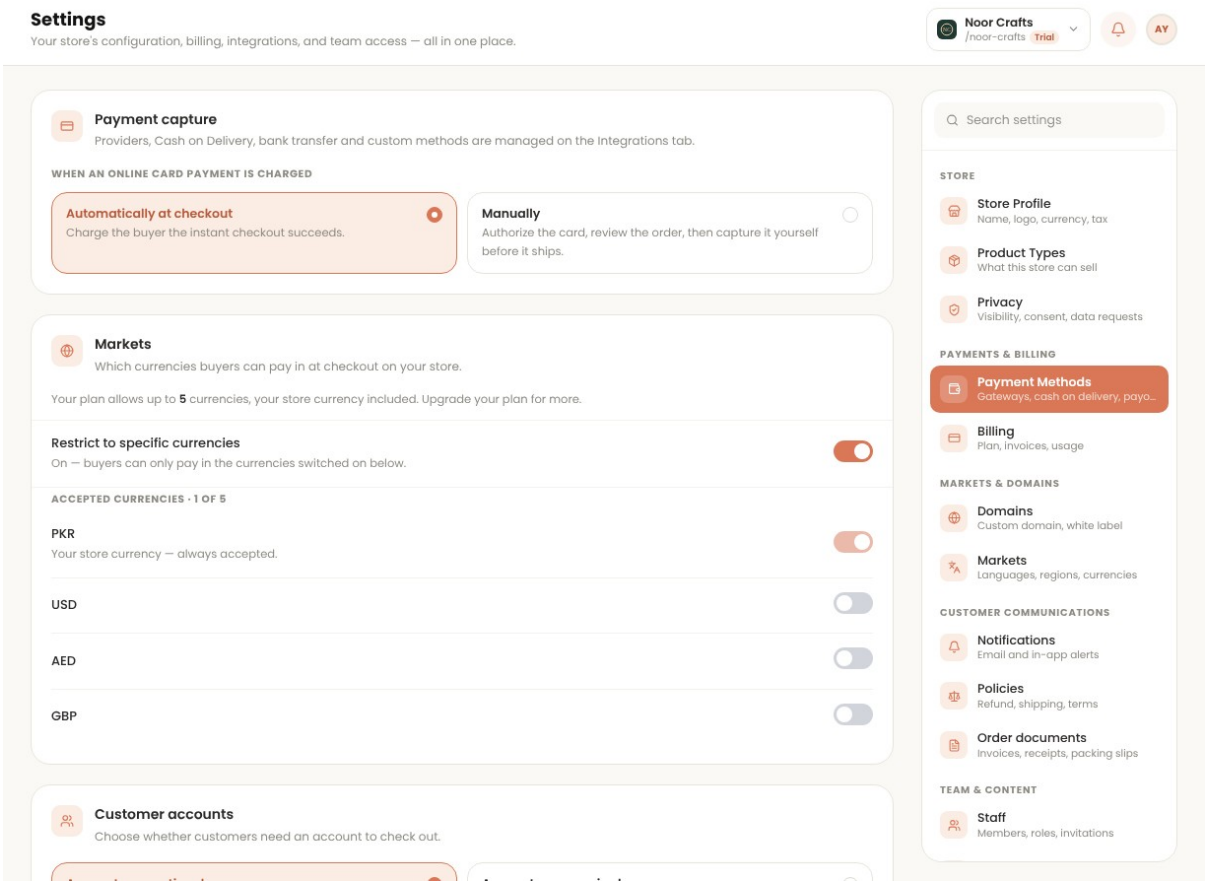

What you'll see: buyers can choose bank transfer and upload a screenshot of their payment. You'll find it under **Orders → Payment Proofs**.

Payment by transfer (Easypaisa, JazzCash, bank, pay at pickup):

1. Click **Add**.
2. Pick a template: **Easypaisa**, **JazzCash**, **Bank transfer** or **Pay at pickup**.
3. Check the **Name*** buyers will see and write the **Payment instructions** (for example your Easypaisa number and account name).
4. Switch on **Offer at checkout** and save.

Screen 5.3: Settings → Payment Methods

Use case: general payment rules for your checkout.

Settings, Payment Methods tab: Payment capture, Markets and Customer accounts

- **Payment capture:** take card payments **Automatically at checkout** (recommended) or **Manually** after you check each order.
- **Markets:** turn on **Restrict to specific currencies** and choose **Accepted currencies** if you sell in more than one currency. How many you can add depends on your plan.
- **Customer accounts:** let buyers check out as guests, or ask them to create an account.

باب 5: ادائیگی وصول کریں

ہر نئے اسٹور میں Cash on Delivery پہلے سے آن ہے۔ مزید طریقے **Settings → Integrations** میں شامل کریں؛ جو طریقے نظر آتے ہیں وہ آپ کے **Store Country** پر منحصر ہیں۔

اسکرین 5.1: **Payment providers** (آن لائن ادائیگی)

استعمال: کارڈ اور والٹ سے آن لائن ادائیگی۔ رقم سیدھی آپ کے اپنے اکاؤنٹ میں جاتی ہے۔ پاکستان میں Safepay اور PayFast دستیاب ہیں۔

1. پہلے متعلقہ کمپنی (مثلاً Safepay) کی ویب سائٹ پر اکاؤنٹ بنا کر اپنی Keys حاصل کریں۔
2. اس کے کارڈ پر **Connect** پر کلک کریں اور Keys پیسٹ کر کے محفوظ کریں۔
3. کارڈ پر دکھایا گیا اضافی مرحلہ مکمل کریں (Safepay پر **One step left**)۔
4. **Test** پر کلک کریں، پھر **Enabled at checkout** آن کریں۔

آپ کیا دیکھیں گے: کارڈ پر **Connected** اور **Live** لکھا آئے گا۔

Note: Stripe پاکستان کی کاروباروں کو سپورٹ نہیں کرتا۔ PayFast یا Safepay جیسے اداروں کے ذریعے ادائیگی پر پلان کے مطابق معمولی Solvexo فیس لگتی ہے؛ Cash on Delivery اور بینک ٹرانسفر پر کوئی فیس نہیں۔

اسکرین 5.2: Manual payment methods

استعمال: وہ ادائیگیاں جو آپ خود وصول کرتے ہیں۔ آرڈر تب تک غیر ادا شدہ رہتا ہے جب تک آپ اسے ادا شدہ نہ کریں۔

- **Cash on Delivery (COD)**: پہلے سے آن ہے۔
- **Bank Transfer: Connect** پر کلک کریں، **Account Title**، **Bank Name*** اور **Account Number*** لکھیں اور محفوظ کریں۔ خریدار ادائیگی کی تصویر اپ لوڈ کریں گے جو **Orders → Payment Proofs** میں ملے گی۔
- **Payment by transfer: Add** پر کلک کریں، **Bank transfer**، **JazzCash**، **Easypaisa** یا **Pay at pickup** منتخب کریں، **Payment instructions** میں اپنا نمبر اور اکاؤنٹ کا نام لکھیں اور **Offer at checkout** آن کریں۔

اسکرین 5.3: Settings → Payment Methods

استعمال: چیک آؤٹ کے عمومی قواعد: **Payment capture** (خودبخود یا دستی)، **Markets** (قبول شدہ کرنسیاں) اور **Customer accounts** (مہمان کے طور پر خریداری یا اکاؤنٹ لازمی)۔
